SKILLS

- Problem solving
- Structured thinking
- Technical communication
- Teamwork
- Product mindset
- Self-taught learning

TECHNOLOGIES

Development
iOS (Swift, UIKit, SwiftUI)
Web (HTML, CSS, JavaScript, PHP, Laravel, React)

Backend & Data
REST APIs
API Automation · SQL · Firebase

IA & Automation
OpenAI API · Prompt Engineering · n8n · API Automation

Tools
Git · GitHub · Jira · SCRUM

LANGUAGES

Spanish — Native
Italian — B2
English — B1

NICOLAS LLANOS

Product-focused professional who builds AI-powered systems and automation tools for real business operations.

Designs and develops platforms that combine software, automation, and artificial intelligence to simplify workflows, reduce manual tasks, and improve operational efficiency. Experience in fintech, SaaS platforms, and intelligent automation systems.

PROFESSIONAL EXPERIENCE

Founder & Digital Systems Architect | (Sept 2025- Present)

iAgency - Remote

- I founded iAgency to design and build intelligent digital systems aligned with business growth. I lead the full development cycle: operational diagnosis, technical architecture, web platform development, and integration of automation and artificial intelligence.
- Design and development of custom software, management dashboards, and operational platforms adapted to real business processes.
- Integration of APIs, workflow automation, and AI conversational assistants within digital ecosystems.
- Construction of scalable and modular architectures, prioritizing structural clarity, maintainability, and product evolution.

Freelance Full Stack Developer | Remote (2022 — Present)

- Development of custom web applications and systems for independent clients and small businesses. Implementation of business logic, user authentication, and role-based access control in multi-user environments.
- Design of relational databases and development of dynamic interfaces (calendars, tables with filters, modals) optimized for real operational use.
- Improvement of performance and modular organization of code to facilitate maintenance and scalability.

iOS Mobile Developer | (Nov 2021 — Dec 2024)

Applica Mobile - Santa Fe, Argentina

- Development of iOS applications for fintech and logistics environments (digital wallets, QR payments, and shipment management).
- MVC/MVVM architectures in production applications.
- Integration of REST APIs, authentication, and KYC/AML.
- Development of hybrid WebViews and monitoring with analytics and crash reporting tools.

Full Stack Software Developer | (Jun 2021 — Nov 2021)

Impronta Solutions - Santa Fe, Argentina

- Development of modules and functionalities in a modular enterprise platform for mutual entities, using JavaScript, HTML, and SQL within a proprietary internal framework.

PROFESSIONAL EDUCATION

Higher Technician in Software Development

April 2019 – December 2021

Instituto de Estudios Superiores — Santa Fe, Argentina

- Training in programming, databases, operating systems, and software engineering with professional practice.

Continuous Training

- Online courses and self-taught learning in web development, automation with n8n, API integration, and agile methodologies.
